1. Go to the CASC website Events page.
2. Register for the webinar.
3. Receive login information by email.

Who should attend?

Anyone interested in equity, diversity and inclusion. Educators, Exhibition Designers, Writers, Administrators, Programming Staff, Management ..

Questions?

info@casc-accs.com

You've probably heard the recent buzz about equity, diversity and inclusion (EDI) in STEM education. This lens on STEM is very timely and necessary, but it is not new. A central question of this approach to STEM has been: how can we help our colleagues and visitors gain a deeper understanding of equity, bias and systemic barriers in STEM? It's time to add: how can we help STEM students and practitioners **DO SOMETHING CONSTRUCTIVE** with their improved understanding?

This webinar uses engaging activities to highlight the latest scientific research on STEM equity. By gaining a deeper appreciation for how barriers are created for women and historically marginalized individuals in STEM, you will be better equipped to lead the challenging, yet necessary conversations about EDI in your Science Centre spaces. As leaders in informal education we have a unique opportunity outside the regular classroom space to address and break down barriers in STEM.

Azadeh Shirzadi is a secondary science teacher on secondment at the Ontario Science Centre and the founder of STEMneutral, a program that helps students and teachers neutralize the STEM playing field for all. She is an impassioned educator who aims to teach students to think critically about the ever-changing world around them and to challenge the status quo. You can find out more about the program at www.stemneutral.com.

Ce webinaire se déroule tout en anglais, mais vous pouvez adresser vos questions en français à l'instructeur bilingue.

About CASC

The Canadian Association of Science Centres builds capacity for its members to inspire a creative and prosperous Canada through science and technology engagement.

We are a national platform for Canada's Science Centres and informal science engagement. We represent 45 Science Centres, Museums, Aquariums and Planetariums across Canada that attract 8 million visitors annually, of which 6 million are adults.
